modified non-encrypted media stream components wherein the modifying process comprises at least one of is selected from a group consisting of a lossy compression, a lossless compression, altering a size of at least one media stream component, and altering a timing of transmission of at least one media stream component; and wherein the modification process is not applicable to the encrypted video components.

Claim 54: An apparatus for generating a multiplex of media streams, the apparatus comprising: an interface, for receiving a set of media streams, each media stream of the set of media streams comprises non-encrypted media stream components and encrypted media stream components that comprise encrypted video components; a statistical multiplexing unit for applying a modification process on the non- encrypted media stream components, so as to provide at least one modified non encrypted media stream component wherein the modifying process comprises at least one of is selected from a group consisting of a lossy compression, a lossless compression, altering a size of at least one media stream component, and altering a timing of transmission of at least one media stream component; wherein the modification process is not applicable to the encrypted video components, and for multiplexing at least the encrypted media stream components and the modified non-encrypted media stream components.

Claims 40-53: (canceled)

Claims 92-105: (canceled)

2. The following is an examiner's statement of reasons for allowance:

Claims 1, 3-39, 54, 56-91, 110-117 are allowed over prior art.

wherein the modification process is not applicable to the encrypted video components.”

In claim 54:

“a statistical multiplexing unit for applying a modification process on the non- encrypted media stream components, so as to provide at least one modified non encrypted media stream component wherein the modifying process is selected from a group consisting of a lossy compression, a lossless compression, altering a size of at least one media stream component, and altering a timing of transmission of at least one media stream component; wherein the modification process is not applicable to the encrypted video components, and for multiplexing at least the encrypted media stream components and the modified non-encrypted media stream components.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
